Integration of **AI-Based Applications** for Contract Management

Summary

Successful integration of an AI based application providing analytical solutions to study legal contracts. Based on the analysis it provides the health score of contracts which helps to avoid possible loopholes in the contract terms. It also keeps the track of contract dates, important events, and approvals.

Problem Statement

The product manager wanted to integrate the application with other third-party utilities to enhance the features of the platform. Activities like managing the contract details via Microsoft Word and Outlook Add-Ins, Slack, Team chatbots, Mail & File service integration with Outlook, Google Drive, OneDrive, and Google Calendar.

Solution

A multi-dimensional approach was taken for the seamless integration

✓	✓	✓
Integrated the platform's APIs to Slack and Team Bots which allowed platform users to log in via the bot and manage the contract from their selected applications	File service integrations were made where users can upload or download files from cloud-based storage like OneDrive and Google Drive	Google Calendar was Integrated to export important events to the User's Google Calendar
